

Felt Wicking

Felt Wicking is specially manufactured round felt that is supplied in diameters from 1/8" to 1". This product is made in two densities & colors from pressed wool felt – either white F-1 felt, or grey F-3 felt. This product is commonly used for lubrication wicks that deliver lubricants from a reservoir to a bearing surface. Felt Wicking is also used for packing, wiping, vibration dampening, and sealing applications.

*Asterisk designates special close-out or overstock pricing on this item – call for details.

Special Orders normally require a 3-4 week lead time and a manufacturing minimum. Items designated as in-stock are normally inventoried, but may occasionally be in the process of being produced, thus requiring a 3-4 week lead time.

- Wool Felt is a natural material and color/shade variation exists in the color of the raw wool
- Industrial felt is not guaranteed to be 100% free of wrinkles/blemishes, as those are a natural product of the manufacturing process.
- Direct inquiries to Sutherland Felt Co. are subject to a \$100 minimum order. Please feel free to call for pricing. Lower minimums as well as close outs can be found at our online store – www.thefeltcompany.com
- Special orders normally require a 3-4 week lead time and a manufacturing minimum. Items designated as in-stock normally ship within 24 hours
